

Solution Benefits

- Eliminates time lags between field action and stakeholders awareness
- Reduces errors by sensing, capturing, notifying and reacting to various events through workflow automation and business rule enforcement
- TAA Compliant hardware offers peace of mind and conformity to purchase regulations
- Schedule and opt-in to receive notifications through voice, email and SMS events of particular interest
- Identifies the tag holder to 99.9% accuracy for entering secure areas and buildings

A single solution for a variety of important needs

AiRISTA Flow provides tailored solutions to all levels of government.

Asset Tracking

Asset tracking in government settings carries the important task of protecting large, high value investments including assets procured with tax payer dollars. Ensuring such items are accounted for and locatable is a duty AiRISTA Flow is proud to support with world-class visibility software and tracking technologies.

Automatic Vehicle Location

Understanding fleet dispersement, travel routes, and vehicular status' is important when resources and controls are tight. AiRISTA Flow understands the demands placed on government organizations to get it right and supports custom demands for each entity.

First Responder Safety Support

Operating in the harsh and frequently unpredictable environment of an incident requires highly effective methods to locate, monitor, guide and coordinate the efforts of first responder teams. AiRISTA Flow's flexible government solutions allow first responder teams to set up an instant track and trace solution in an ad-hoc manner at the site of an incident.

AiRISTA Flow works closely with government clients to build solutions that help reach organizational objectives to include the above as well as temperature monitoring, building access control support, electronic hand hygiene monitoring, workflow improvement, process capture, and automation.
